technical and popular report.

Site specific information was compiled for both historic and prehistoric sites from state agencies in Iowa, Minnesota and Wisconsin, and from various local and regional institutions. More than 1,000 historically or architecturally significant sites and districts and, more than 1,400 prehistoric archaeological components were recorded and plotted on base maps. From the site configurations and from other data collected during the course of the records and literature review, a narrative framework for the interpretation of historic and prehistoric sites was developed. Recommendations to enhance the management of the archaeological and historical data base were provided.

Volume 2 focuses specifically on Upper and Lower St. Anthony Falls, and Pool 1. Detailed information regarding the nature and distribution of prehistoric archaeological sites are unavailable; however, historically or architecturally significant structures are well represented, including the Pillsbury "A" Mill, The Cappelen Memorial Bridge and the Minnehaha State Park Historic District.

INTRODUCTION:

Upper and Lower St. Anthony Falls and navigation Pool 1 have not been the focus of any systematic investigations that would provide detailed information regarding the nature and distribution of prehistoric archaeological sites.

Historically or architecturally significant structures, however, are well represented. Four National Register properties do occur within the limits of Upper and Lower St. Anthony Falls and Pool 1, the St. Anthony Falls Historic District, the Pillsbury "A" Mill, The Cappelen Memorial Bridge, and the Minnehaha State Park Historic District.

Prehistoric and historic sites locations are provided in the following illustrations and the tabular format provides additional detail for each recorded site. It should be noted that site distributions are not based on comprehensive systematic survey and thus should not be used for predictive statements. Finally, sites categorized as ineligible unless specifically noted, means simply that they have not been evaluated in terms of National Register criteria.
